

PRASATH M

Technical Support Engineer | IT Operations | System Administration

Chennai, India | +91 8122126203 | hariprasath2954@gmail.com | linkedin.com/in/prasathmurugan

PROFESSIONAL SUMMARY

Enterprise IT support professional with experience supporting Windows infrastructure, Active Directory, Microsoft 365, endpoint environments, networking, identity and access management, and systematic incident resolution. Proven track record supporting enterprise-scale environments comprising 6,000+ endpoints/users and multi-platform Linux-to-AD integrations.

PROFESSIONAL EXPERIENCE

Technical Support Engineer | Aspire Systems | Chennai, India

Feb 2026 – Present

- Provide enterprise technical support for Windows systems, applications, hardware, software, and endpoint issues using structured troubleshooting, incident resolution, documentation, and escalation procedures.
- Perform user provisioning, account configuration, access management, password administration, and role-based permissions to support enterprise identity and access requirements.
- Support Active Directory and Microsoft 365 administration, including users, groups, Outlook, Teams, and OneDrive, with user-access and application troubleshooting.
- Troubleshoot TCP/IP, DNS, DHCP, VPN, Ethernet, firewall, software, and endpoint issues using systematic diagnostics and escalation procedures.
- Support enterprise endpoint and security operations involving EDR/XDR and Zscaler ZIA, including alert triage, endpoint-agent troubleshooting, security-log monitoring, and policy-related issue resolution.

AR/VR Intern | Monolith Technologies Pvt. Ltd. | Chennai, India

Aug 2024 – Nov 2024

- Developed and tested Shogun Run using Unreal Engine 5, contributing to gameplay implementation, debugging, testing, and performance optimization.

SELECTED ENTERPRISE PROJECTS (ASPIRE SYSTEMS)

Ubuntu-to-Active Directory Migration (2026)

Supported migration of 200+ Ubuntu Linux users into Windows Active Directory using SSSD and Realmd, enabling centralized authentication, identity management, and policy enforcement.

Endpoint & Cloud Security Support (2026)

Supported EDR/XDR and Zscaler ZIA operations across 6,000+ endpoints, including security-log monitoring, alert triage, incident escalation, agent troubleshooting, and policy-conflict resolution.

Windows 10-to-11 Upgrade (2026)

Supported Windows 10-to-Windows 11 upgrades for 6,000+ users, covering system preparation, installation, configuration, validation, and post-upgrade troubleshooting.
